One Systems Appoints New International Distributors

Nashville, Tennessee, January, 2010 - One Systems, a leading manufacturer of all-weather high output loudspeaker systems, recently appointed seven new international distributors to serve customers in Australia, France, Greece, Japan, India, New Zealand and South Africa.

CMI Music & Audio, led by CEO, Peter Trojkovic, will handle responsibilities in Australia. France will be represented by NS Distribution, where Bruno Souchaud is the Managing Director., Omikron Control SA will handle distribution in Greece.

Additional new distributor appointments include M and N Co., Inc, of Japan, spear headed by Toshio Kojima and Masaki Morimoto. ARN Systems P Ltd. in India, Jansen Professional Audio & Lighting, led by Director Simon Adams and lastly ProSound (Pty)., Ltd. of South Africa led by Terry Acres and Grant Scott. All appointments are effective immediately.

The distribution partners see the One Systems line as opening new opportunities. "One Systems' line of direct weather speakers are a great fit for CMI Music & Audio," says Trojkovic. "Good quality direct weather speakers are a rarity and when we were presented with the opportunity to represent the product in Australia we did not have to think twice."

"The sound is incredible! The weather resistance, flexibility of use, and the simple fact that they cope with the harsh sun and wet salt laden air of New Zealand made this a perfect match for Jansen," says Adams.

“We are thrilled to be complementing our international distribution and representative roster with these outstanding business partners,” says One Systems President, Doug MacCallum. “Each distribution firm and their fellow staff members are seasoned pros and we are grateful to have them join our team.”

###

Headquartered in Nashville, TN, One Systems, Inc. is a high-quality manufacturer of direct-weather loudspeaker systems. Established in 2006, One Systems, Inc. is the developer of Equivalent Throat Technology (patent pending), which creates wider sound dispersion and beam width than conventional driver designs, and the Inside/Only Voice coil (patent pending), which, for the first time, provides consistent thermal conductivity regardless of voice coil height. <http://onesystems.com>.
