## **One Systems Chosen for Ngong Ping 360 Village, Hong Kong**

**Nashville, Tennessee, December, 2009** – Ngong Ping 360 Village, atop Lantau Island in Hong Kong, has recently selected One Systems Direct Weather loudspeakers for a new installation. The installation includes three pole-mounted 108IM direct weather loudspeakers that greet visitors at the entrance gate, as well as an additional four 108IM direct weather speakers for supplemental portable use during live performances.

Ngong Ping, a popular tourist attraction, is a cultural themed village designed and landscaped to educate visitors, as well as reflect upon the spiritual integrity of the Ngong Ping area. The 1,500 square meter village features multimedia guided tours, and is accessible by bus or the Ngong Ping Cable car, a 5.7km long bi-cable gondola system with breathtaking views. One of the most popular attractions is Walking with the Buddha, a multimedia attraction offering visitors a peak into the journey to enlightenment of Siddhartha Gautama and how he became Buddha. Other notable attractions include: Monkey's Tale Theatre, a computer generated comedic film for all ages, the Ngong Ping Tea house where guests can sample traditional Chinese tea and cakes, as well as a diverse array of retail shops throughout the village.

Toward the end of 2008, Ngong Ping investors knew that the entrance gate was in need of a permanent, cost effective and reliable speaker system to advise guests of upcoming special events and information. When Sound Classy of Hong Kong and their system integrator, Johnson Controls Hong Kong Limited, were awarded the contract to design and install the new system, they chose One Systems speakers based on their experiences from previous installations. Him Chan, a Sound Classy representative

says, “We have never been disappointed with One Systems, and our client is more than pleased with their performance. Due to the uncertain environmental conditions atop Lantau Island, One Systems has proven to be the best choice in loudspeakers due to their high vocal intelligibility, excellent sound quality and weatherproof design.”

Doug MacCallum, One Systems president says, “The installation at Ngong Ping is our second now within the Hong Kong tourism industry and shows our continued efforts to expand our global reach. We continue to work toward our objective of becoming the leading manufacturer of direct weather speaker systems.”

###

*Headquartered in Nashville, TN, One Systems, Inc. is a high-quality manufacturer of direct-weather loudspeaker systems. Established in 2006, One Systems, Inc. is the developer of Equivalent Throat Technology (patent pending), which creates wider sound dispersion and beam width than conventional driver designs, and the Inside/Only Voice coil (patent pending), which, for the first time, provides consistent thermal conductivity regardless of voice coil height. <http://onesystems.com>.*
