**Nashville, TN USA – March 24, 2010:** One Systems, Inc., a high-quality manufacturer of professional live sound direct-weather loudspeaker systems, has appointed Mike Torlone as its sales and marketing manager effective immediately.

Mike comes to One Systems after having served as Market Development Manager and Director of Marketing Services at AKG Acoustics in Nashville, TN and Northridge, CA. Prior to AKG, he spent several years in sales and marketing management positions at Electro-Voice, Inc and Telex Communications.

One Systems, Inc. president, Doug MacCallum said “Mike offers a wealth of experience, knowledge and an impeccable track record within the pro audio industry. He has been responsible for bringing many industry leading products to market through the years. In addition, Mike has earned the utmost respect of peers within the industry from sound engineers, systems contractors and consultants. Mike will help One Systems and its partners reach new levels of success.”

Mike has a bachelor’s degree in journalism from Marshall University and a master’s in project management from Villanova University. He is also a Synergistic Audio Concepts graduate and a member of the Audio Engineering Society.

Mike Torlone said “I’m proud to be working with One Systems and presenting the brand’s incredible, competitively-unique products to contractors, consultants and end-users. I look forward to working towards the mutual success of the brand and our partners worldwide.”

One Systems will be displaying its product line in Frankfurt, Germany at **prolight + sound 2010** in Hall 8.0, Stand # J 70C. The company will be displaying its line of direct-weather powered and passive full-range and subwoofer systems.

*Headquartered in Nashville, TN, One Systems, Inc. is a high-quality manufacturer of direct-weather loudspeaker systems. Established in 2006, One Systems, Inc. is the developer of Equivalent Throat Technology (patent pending), which creates wider sound dispersion and beam width than conventional driver designs, and the Inside/Only Voice coil (patent pending), which, for the first time, provides consistent thermal conductivity regardless of voice coil height.*
